INTRODUCTION

The heaviest public attention during the legislative session in 1992 was focused on difficult budget decisions, but other far-reaching legislation went to the governor's desk on a number of important fronts.

Civil rights, jobs development, California's business climate and consumer protections were key issues in 1992.

New crimes were created to reflect our changing times. It will be an offense to send faxes to people who declare they don't want them or to block the passage of a person trying to enter a health facility or place of worship. It will be illegal to record conversations overheard on cellular phones or to brandish laser scopes with intent to cause fear of harm.

As another concession to the times, even bungee jumping found its place on the books.

This document summarizes hundreds of new measures, from animal rights to welfare, that cleared the Legislature in 1992. The bulk of the bills signed by Governor Wilson will take effect on New Year's Day, 1993.

These new laws will make it more difficult for divorced parents to evade child-support orders, permit suspension of students who sexually harass others and strengthen and widen prohibitions on discrimination against protected groups, including gays and the disabled.

In the future, the death penalty will be carried out by lethal injection rather than by lethal gas. Judges and the Board of Prison Terms will be asked to consider battered women's syndrome as a mitigating factor in setting sentences or recommending a governor's pardon.

Fees for transactions at automated teller machines will have to be disclosed up-front to consumers. Bereaved Californians will have new rights in making price comparisons at different mortuaries. Car dealers will have to disclose the number of vehicles available at an advertised price.

1992 Legislative Accomplishments

“Charter schools” will receive public funding without some of the strings of regulation, giving them new freedoms to try innovative approaches to education. Parents can purchase \$1,000 state savings bonds to help put away money for their children’s college educations.

School enrollments have continued to soar, crowding classrooms. Voters at the next statewide election will be asked to permit approval of local bond issues for school construction by a simple majority, rather than by two-thirds, of voters.

Natural disasters and other emergencies dogged the session of 1992. An “Emergencies and Disasters” section documents the Legislature’s response to the East Bay fire storm, earthquakes in Humboldt, San Bernardino and Riverside counties and the Los Angeles disturbances.

Many significant bills that reached the governor’s desk were not signed, and they also are included here. Vetoed bills would have improved enforcement of labor laws in California’s agricultural fields, taken a comprehensive approach to addressing costs of health care and auto insurance, created a constitutional revision commission to recommend changes in the budgeting process and prohibited secret settlements that conceal evidence of dangerous product defects.
